Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, and 7-87 are rejected under 35 U.S.C. 102(b) as being anticipated by Hetz (US 4,530,362).

In regard to claims 1 and 41, Hetz teaches in Fig. 1 (reproduced below), an ultrasonic

receiver for an electronic device comprising a housing (1), an ultrasonic transducer element (20 and 30) disposed in the housing wherein all ultrasonic transducer elements are inherently responsive to an impinging acoustic signal and producing an output electrical signal representing an acoustic waveform defined by the impinging acoustic signal. Hetz further teaches a signal processing section (see Fig. 1 above) which inherently includes electronic circuitry for

processing the output signal wherein the receiver would be responsive to a cycle of the acoustic waveform defined by the impinging acoustic signal.

In regard to claims 2, 7-40, and 42-87, remote transmission, the various shapes and sizes of the transducer element and the piezoelectric materials of the transducer element are well known in the art of ultrasound imaging.

Allowable Subject Matter

3. Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
